

### Standard

GB/T 12972, MT 818, or other standards required by customers.

### Features

Certified by authoritative test labs, safe and reliable.

### Applications

Sino-cables type mining cable is primarily used in coal cutter, moving machine, other mining purposes, or similar equipment.

### Package

in coil, steel and wooden reel, steel reel, wooden reel.

Rudong Economic Development Area,  
Jiangsu, China 226400

## Type, Description and Application

Type	Description	Application
MC	rubber insulated and sheathed cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.38/0.66KV
MCP	rubber insulated and sheathed shielded flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.38/0.66KV, 0.66/1.14KV, 1.9/3.3KV
MCPTJ	rubber insulated and sheathed metal shielded monitoring flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.66/1.14KV, 1.9/3.3KV
MCPT	rubber insulated and sheathed metal shielded flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 1.9/3.3KV
MCPJA	rubber insulated and sheathed metal shielded monitoring braid reinforced flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.66/1.14KV. cables can be pulled directly.
MCPJB	rubber insulated and sheathed metal shielded monitoring wrap reinforced flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.66/1.14KV. cables must be under the protection of chain board.
MCPTB	rubber insulated and sheathed metal shielded monitoring braid reinforced flexible cable for coal cutter	connecting power for coal cutter or similar machines with rated voltage at 0.66/1.14KV, 1.9/3.3KV.
MYQ	light-duty rubber flexible cable	connecting power for light power, belt conveyor and signal equipment underground at 0.3/0.5KV
MY	rubber moving flexible cable	connecting power for moving machines in the mines at 0.38/0.66KV
MYP	rubber moving shielded flexible cable	connecting power for moving machines in the mines at 0.38/0.66KV, 0.66/1.14KV
MYPT	rubber metal shielded flexible cable for coal mining	connecting power for moving cutting machine in the mines at 6/10KV
MYPTJ	rubber metal shielded monitoring flexible cable for coal mining	
<b>*For more details on cables, please feel free to consult to our sales.</b>
